AUTOMATION

INDUSTRIAL AUTOMATION AND CONTROLS

What we do:

Omni Automation offers a full range of Industrial automation services including Industrial Controls, Robotics, Custom Industrial Machinery and Engineering Services. Since 1961, Omni Automation has offered our customers complete turnkey solutions in a timely manner. Using the latest automation technology and software, we provide high quality automation solutions and systems to our customers. Our core products and services include:

- Industrial Control Systems
- Industrial Robotics
- Industrial Vision and ID Systems
- Automated Industrial Machinery
- Electrical and Mechanical Engineering Services
- Field Installations
- Project Management

FANUC ROBOTICS

Omni Automation is a factory authorized Distributor/Integrator of FANUC Industrial Robotics. As an authorized Distributor/Integrator we offer a wide variety of robotic solutions including machine tending, palletizing, pick and place, case packing, and a variety of other applications. Fanuc Robotics is the world leader in industrial robots with payload capabilities ranging from 0.5kg to 1,350kg. FANUC America manufactures the most complete line of industrial robots in the industry for nearly every manufacturing application.

COLLABORATIVE ROBOTICS

FANUC's CRX Cobots are safe, easy-to-use, reliable, and a versatile solution for a wide range of applications, including inspection, machine load/unload, packing, palletizing, sanding, welding, and more. The CRX Cobots can detect external forces in the workspace, stopping safely when making contact with a person or object. This technology allows the CRX to work safely alongside people without the need for expensive guarding.

The CRX series of collaborative robots is the perfect solution for manufacturers with little to no robotic experience. The ease of programming paired with FANUC's world-renowned technology, proven reliability, and sensitive contact detection allows the CRX Cobots to work safely alongside people in a variety of industrial and manufacturing jobs.

GRX COLLABORATIVE SERIES

COGNEX

Omni Automation is a Certified System Integrator for Cognex. Cognex Corporation is the world's leading provider of vision systems, vision software, vision sensors and surface inspection systems used in manufacturing automation.

Cognex also offers the most advanced technology available for 1-D barcode and for 2-D Data Matrix barcode code reading. Regardless of the barcode symbology, size, quality, printing method, or surface the codes are marked on, we can read it! DataMan fixed-mount and handheld barcode readers are available in several platforms and have multiple model choices so you can select the right barcode reader for your application

MiR ROBOTS

MiR robots are user-friendly and efficient mobile industrial robots for automation of internal transport and logistics solutions. The robot optimizes workflows, freeing up staff resources and allowing you to increase productivity while reducing costs. MiR robots belong to a new generation of advanced mobile robots which gives you a rapid return on investment, often with a payback period of less than a year. Technology enables the robot to either "identify" its driving area and surroundings or import 3D drawings of the building layout
